DESCRIPTION AND PURPOSE OF ITEM

This item is a PERMANENT four-digit number assigned to each structure which, when combined with Item 3 - Structure County - forms a unique number for each structure in the state. This number facilitates data management and interagency communications concerning structures.

Twin or parallel structures are numbered individually. A structure with a closed median is considered as one structure, not two.

CODE AND SCREEN ENTRY INSTRUCTIONS

A four-digit field, right justified.

Enter the appropriate number in the last four digits of the seven-digit structure number.

The structure numbers allotted to each district range from 0001 through 9999.

Districts may arrange blocks of numbers to identify categories of bridges at their discretion. However, there is no required statewide scheme for this purpose. Specific bridge maintenance categories will be indicated only by Item 21, Maintenance Responsibility.

Once a number has been assigned, it is a permanent ID number and will not be changed to reflect future changes in any categorical scheme.

New structures are to be assigned numbers using the next available number in the appropriate category by district scheme.

Refer to Section E, Identification by Structure Number, in the Introduction for additional instructions regarding the assignment of numbers.
